

Protect your Business and your Data with **Commercial Cyber & Privacy Services**

Quote & Buy

Why Does Your Business Need Cyber & Privacy Services?

Hundreds of data breaches happen every week, and they impact tens of thousands of businesses each year. So, we created Commercial Cyber and Privacy services, designed specifically to help you protect your business against a breach and to help you recover in the aftermath. We provide you with resources and a framework to develop a plan that's right for you and your clients. If a breach does occur, our advocates can assess the damage and develop a plan for recovery.

Is your business doing everything you can?

28% of data breaches each year occur at small businesses.

What is Included in Commercial Cyber & Privacy Services?

Essential Employee Education and Training

Our comprehensive online training helps to better educate your employees on basic cyber threats to your business and better strategies to protect against a data breach. We also offer risk assessments to identify weak points in existing security measures. Our cyber compliance training helps explain regulations and legislation for GDPR, Section 500, CCPA, PHI, PII, HIPAA, and SHIELD.

Planning and Protection

We provide extensive planning and protection reference to help your business not only understand its cyber vulnerabilities, but also to create new process and protocols and how to introduce new technology to better protect your client, vendor and internal business data.

Incident Response

In the event of a data breach, we provide 24/7/365 advocacy to help navigate the incident and provide specialized resolution activities to assist with containing the breach and providing assistance with client notification, if necessary, and other business recovery services.

Business Recovery and Ongoing Support

Even once we've helped your business navigate existing cyber concerns, we keep you protected in the future. We constantly monitor your digital footprint, and our services continually update with new technologies to keep your data safe.
