

Protect your Agency and Your Data with **Insurance Data Security Services**

[Quote & Buy](#)

Why Does Your Business Need Insurance Data Security Services?

Due to the Insurance Data Security Act, insurance companies are now at greater risk for fines due to non-compliance with protection and reporting requirements. These new requirements cover your entire cybersecurity risk profile, from risk assessments and training to investigation, notification, and incident response. Our Insurance Data Security Services provides a comprehensive approach to your data security.

What is Included in Insurance Data Security Services?

COVID-19 Services

This global pandemic has fundamentally changed operating models around the world. Our COVID-19 services help you and your employees adapt to this new normal with unbiased and vetted information resources that support businesses and families.

Business Growth and Continuity Plans

Business survival requires growth and continuity plans. To achieve growth we optimize business strategy and market position. Continuity plans are essential to survive a disaster or if a tragedy strikes the principal. Reputation management is part of growth and continuity to secure and maintain public image.

Commercial Cyber Protection and Security

Your business can suffer devastating losses from identity theft or a privacy breach. We analyze your digital footprint to identify any weak links and help resolve threats. If a breach occurs, we offer urgent assistance, fraud resolution, document replacement, and more to help you recover quickly.

Regulatory and Compliance Services

Regulatory and compliance standards are changing constantly. We keep our fingers on the pulse of changes coming from relevant regulations, including PPP, WISP and HR/Benefits changes, and provide simple and innovative solutions to facilitate small and medium enterprise compliance.

**Is your business doing
everything you can?**

34% of businesses own a standalone cyber insurance policy.
