

Protect your Investment with **Fix and Flip Services**

Why Do You Need Fix and Flip Services?

Whether you are a first-time flipper or a seasoned veteran, you must be prepared for the unexpected when undertaking a renovation project. By combining the required insurance with high-touch services, Brightly CCJG Insurance gives you the protection you need against injuries, insurance claims, or damage at the worksite. Whether your project is six months, nine months, or a year, we can customize your policy to fit your needs.

Is your investment protected?

The average flipper sees an **85% return on investment.**

What is Included in Fix and Flip Services?

Assess

We begin by assessing your risks for data compromise or breach. You cannot protect what you don't know exists or where it is stored. We use thorough risk assessments for your business and information technology across people, processes, premises, and technology.

Protect

After completing our risk assessments, we help your business implement and enhance existing data protections. We help you develop Incident Response Plans, Information Security Plans, and policies and procedures to protect your business data. We can also help you build out your technology architecture, employee training processes, and software capabilities.

Support

We combine your business protections and risk assessments to help you mitigate risks in your data security. We provide regulatory compliance services, legal services, operational enhancement, disaster recovery services, and more. All of the services we provide to our clients are enhanced through the support of a 24-hr concierge.

Respond

Without a well-developed and rehearsed incident response plan, your business could suffer extreme compromises to your data and brand reputation. We provide you with all the tools you need to effectively respond to an incident, including forensic services, customer continuity services, red flag logs, and more.
