

Specialized Protection Services for Healthcare Providers

Quote & Buy

Why Do Healthcare Providers Need Specialty Services?

Healthcare providers are the ones who care for our families in times of need. Now it is our turn to protect them. Brightly's Healthcare provider Protection Services cover a range of potential challenges facing providers. The services can be bundled to create a broader insurance protection package for you, your employees and families. We offer a full suite of comprehensive services designed to protect all from a range of possible challenges — from bad COVID-19 information to natural disasters to family caregiver services to cyber security and protection.

What Speciality Services are Included?

Family Cyber Protection and Security

Your patients and employees can suffer devastating losses from identity theft or a privacy breach to their home or family. We analyze the digital footprint to identify any weak links and help resolve threats. If a breach occurs, we offer urgent assistance, fraud resolution, document replacement, and more to help your clients recover quickly.

Caregiver Support Services

Every year, thousands of families incur physical and emotional costs when providing care for a family member. Our support services and resources help your employee's or patient's family manage these costs and stresses when someone becomes a full or part time caregiver to a loved one.

Natural Disaster and Flood Preparedness

We assess the risk to client properties for floods and natural disasters. We provide guidelines and tools to prepare for a possible disaster. If disaster strikes, we help them find safety in the immediate aftermath, and then help them recover and resume business operations quickly by organizing claims and paperwork.

COVID-19 Services

This global pandemic has fundamentally changed operating models around the world. Our COVID-19 services help your patients and team adapt to this new normal with unbiased and vetted information resources that support businesses and families.

Problems Preparing for Natural Disasters

- Communication and collecting information
- Underestimated threat of Katrina
- Felt rushed and disorganized
