

Protect your Family with **Personal Disaster Response Services**

[Quote & Buy](#)

Why Personal Disaster Response Services?

Help keep your family safe by developing a personal disaster response plan so you are prepared for whatever comes your way. We are there for a family before a natural disaster to help with the plan, during a natural disaster to help them find safety and shelter, and after a natural disaster to help them restore their lives.

You may not be able to keep disasters from happening, but you can control how you prepare for them.

Policy features may vary by carrier.

Number of Natural Disasters in America 2019

What is Included in Personal Disaster Response Services?

Family Preparations and Risk Assessment

We help our client prepare for the possibility of a disaster by doing a thorough disaster risk analysis and creating a Disaster Kit and plan. Having and rehearsing a plan helps improve the safety of the family before, during and after a disaster.

Disaster Response Advocacy

We use state-specific disaster response information to communicate with clients as a disaster happens. Knowing the areas and routes to avoid and which are recommended helps keep everyone safe.

Personal Assistance Services for Victims

If our clients and their families are the victims of natural or unexpected disaster, our experienced personal advocates walk them through how to stay safe and recover.

Children, Seniors, Special Needs, and Pets

Our experts help families design custom preparedness and response solutions that work for them, including services to meet the specific needs of children, seniors, special needs family members, and even pets.
